

NX | **LEXUS**
EXPERIENCE AMAZING

THE SIGNATURE LEXUS CROSSOVER

Created for those with unstoppable ambition, the Lexus NX will make you feel like anything is possible. From the moment you slip behind the wheel, you'll feel the effortless power of Lexus's turbocharged*, 175 KW* SUV, perfectly complemented with a luxurious and intricately designed interior.

*NX 300 EX and NX 300 F SPORT models only

Three models make up the NX 300 range:
NX 300 EX (AWD)
NX 300h SE (AWD)
NX 300 F SPORT (AWD)

Model Shown NX 300 EX.
South African vehicle specifications may differ.

2.5 HYBRID ENGINE

MORE IMPACT ON YOUR SENSES LESS IMPACT ON THE EARTH

The Lexus Hybrid Drive system on the NX 300h SE works in concert with the Electronically Controlled CVT (Continuously Variable Transmission) to environmentally upgrade your drive with high fuel efficiency (6.0 litres/100km), clean emissions, and surprising quietness. While eco-conscious, the vehicle does not compromise on performance, offering extraordinary power (114 kW @ 5700 rpm) and torque (210 Nm @ 4200 - 4400 rpm). The 2.5-litre 4-cylinder engine operates on the Atkinson Cycle and has highly-efficient intake and exhaust systems to deliver optimal output performance.

STOP START

Stop/start technology and exhaust heat recycling help reduce fuel consumption and emissions. The wider range of inlet timing variation in the VVT-i system means that the new NX engine can switch instantly from the Otto Cycle to the high-expansion ratio, high-efficiency Atkinson Cycle, according to vehicle operating conditions.

2.0 TURBO ENGINE

PUT THE PEDAL TO THE TURBO CHARGED

METAL

With their 2.0-litre 4-cylinder direct injection turbocharged engine, the NX 300 EX and NX 300 F SPORT maximise power (175 kW @ 4800 - 5600 rpm) and torque (350 Nm @ 1650 - 4000 rpm) for an exhilarating driving experience. Operating on the Atkinson Cycle, both models achieve excellent fuel efficiency (7.9 litres/100km) and driving performance simultaneously, while exhaust gas interference has been eliminated to improve response over a wider torque band.

The NX 300 range has a sequential-shift 6-speed automatic transmission paired with a sophisticated electronically controlled proactive all-wheel drive system. Sequential shifting can be initiated via the gear lever or paddle shifter on the steering wheel.

Model Shown NX 300 EX. South African vehicle specifications may differ.

COMPETITIVE EDGE

IMAGINATIVE TECHNOLOGY

Technology is integral to Lexus. Imaginative technology, however, is a primary focus of Lexus. Imaginative technology is the result of starting where others may end, going beyond simply developing and innovating new technologies to using them to ignite our imagination for further applications and developments.

EXHILARATING PERFORMANCE

Exhilarating performance is about the feeling of anticipation, or the rush of adrenaline that you experience when you are embarking on something exciting. When you're exhilarated, you're fully immersed in the moment and the experience. Nothing else exists.

TAKUMI CRAFTSMANSHIP

Takumi is an ancient Japanese concept that speaks of the essence of the artisan. At Lexus, it's about applying the subtlety of the human touch to every aspect of our design and development. It is also another example of how we are inspired by a human-centred spirit throughout our business.

BRAVE DESIGN

Brave is about being courageous and confident. Brave design is required to create amazing experiences. Amazing does not come from the familiar or the similar – it requires a confident point of view, a willingness to follow instinct and deliver what we believe is right, not simply what we believe will be pleasing to all.

Model Shown NX 300 F SPORT.
South African vehicle specifications may differ.

THE ART OF
STANDING OUT

The imposing, aggressively-sculpted NX body is designed to stand out from the crowd, but always with style in mind. Strong lines and prominent flares unite the diamond-shaped body, starting at the spindle grille, while the presence of the tyres has been emphasised to show off its powerful stance. The bottom edge of the door panels kick up to pass through the peak of the rear combination lamps, creating unique proportions with a three-dimensional and dynamic feel.

With newly added features such as LED Adaptive High-Beam headlights*, panoramic moonroof*, and power back door*, the NX's good looks serve a practical purpose too.

*Available on select models only.

Model Shown NX 300 F SPORT.
South African vehicle specifications may differ.

AMBITIOUS LUXURY AMBITIOUS DESIGN

EXTERIOR

HANDS-FREE POWER BACK DOOR OPERATION*

The vehicle is available with a hands-free power back door that can be opened and closed by moving one's foot in front of a kick sensor located underneath the rear bumper while carrying the smart key.

LED HEADLAMPS THAT TRULY SHINE

The triple projector lamps incorporate an Adaptive High-Beam System (AHS)*, which automatically optimises the headlamp light distribution, so that the high beams do not directly illuminate preceding or oncoming vehicles.

SPINDLE GRILLE INFORMATION

The NX's unique spindle grille creates a bold three-dimensional expression. Inspired by traditional Japanese etching, the grille has thousands of individual surfaces, each precisely computer calibrated to catch and reflect light.

*Available on F SPORT and Hybrid models only.

Model Shown NX 300h SE.
South African vehicle specifications may differ.

EXHILARATION HAS NEVER FELT SO LUXURIOUS.

A **LEATHER SEATS***

The luxurious perforated leather upholstery is the perfect balance between sophisticated styling and comfort. The seats were created using mathematical curves, effortlessly enveloping the driver for a smooth and supported driving experience.

B **STEERING SWITCHES AND STEERING WHEEL**

Combining unparalleled comfort with exceptional craftsmanship, the genuine leather steering wheel with added grip was created to give you ultimate control. Integrated switches such as Adaptive* Cruise Control and Lane Trace Assist* with Lane Keep Assist* offer convenience at your fingertips.

C **FRONT SEAT ADJUSTMENT**

Personalise your comfort with the power-adjustment driver's seat including lumbar support*, and height-adjustable headrests on every seat. They are designed to envelop the body from head to hip, reducing fatigue and increasing comfort.

D **HEATED AND VENTILATED* SEATS**

Seat heaters are available for the driver and front passenger. On hot days, taking cold air directly from the air conditioner, the unit helps cool the occupants quickly.

E **PANORAMIC VIEW MONITOR***

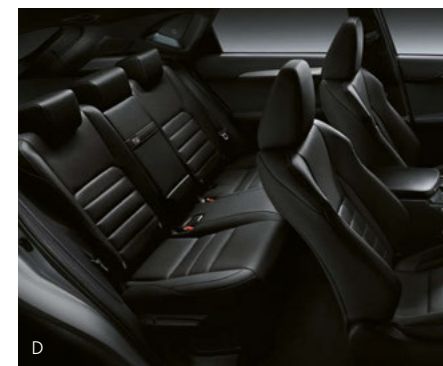

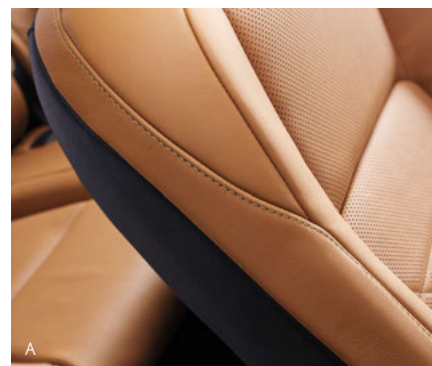

With a Panoramic View Monitor that features overlay guidelines to facilitate steering, drivers can easily reverse into parking spaces. With the aid of a near-360° 3D view video display of your car, the NX raises the bar for its category, combining convenience and innovation to create an SUV that effortlessly manoeuvres through the city.

*Available on F SPORT and Hybrid models only.

Model Shown NX 300h SE.

South African vehicle specifications may differ.

INTERIOR

Images shown for illustrative purposes.

STEP UP AND STEP IN

The NX embraces the philosophy of *Takumi* master craftsmanship, applying the subtlety of the human touch to every aspect of Lexus design and development, and focusing on intricate attention to the very last detail.

Model Shown NX 300h SE.
South African vehicle specifications may differ.

TAKE COMMAND

THE NX'S INTERIOR BLENDS INNOVATION WITH INTUITIVE TECHNOLOGY

WIRELESS CHARGER

A wireless charger located on the centre console enables a portable device or smartphone to be charged by simply placing it on the charging pad, eliminating the need to connect a charging cable and providing ultimate convenience.

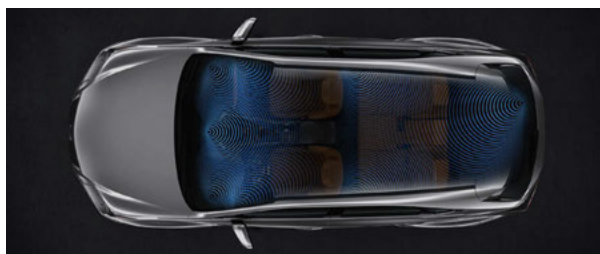

GET CONNECTED WITH MY LEXUS APP

All Lexus vehicles can now be connected to the MyLexus App on your mobile phone, giving you more control of your driving experience and opening up a whole new world of personalised offerings and customisable features, like in-car Wi-Fi, roadside assistance and more. See the back of the brochure for more information.

ADVANCED VOICE RECOGNITION

Voice command recognition in the NX has been greatly improved, thanks to the new dual microphone system, Standard Voice Box® and Nuance® voice-recognition technology that employ integrated on-board/off-board voice recognition, allowing the driver's hands to remain firmly on the steering wheel.

AUDIO

The NX features a 10-speaker audio system that can be linked to smart devices by either Apple CarPlay or Android Auto. All of these display the screen of the smartphone on the vehicle's infotainment screen as well as linking the phone's audio output to the vehicle's speakers.

MULTIMEDIA SCREEN

The standard 10.3-inch VGA touchscreen displays audio, navigation, and multimedia content, in an elevated location, to minimise changes in the driver's line of sight. The VGA display is operated by the effortless touch functionality, or the Remote Touch Interface. All models now incorporate an Electro Multi Vision Navigation (EMV-N) System using the Navibridge application.

REMOTE TOUCH INTERFACE

This touch-sensitive, next-generation Remote Touch Interface seamlessly fits in the advanced NX cockpit, to give you instant access to in-car information including climate, navigation and audio. The Remote Touch Interface aims for a smooth and smart-feeling operation by providing a spacious touch surface with focus given to providing a pleasing texture and haptic feedback.

THRILLING PERFORMANCE ENTHRALLING STYLE

The NX 300 F SPORT model magnifies performance and style from the tyres up. From the unique grille, rear bumper and 18 inch alloys on the outside, to the reflective metallic-finish trim on the pedals and scuff plate, and perforated leather steering wheel and shift knob on the inside; the NX 300 F SPORT grabs your attention and doesn't let go. The exquisite sports seats, which hold you firmly in place, were designed with performance conditions in mind.

Model Shown NX 300 F SPORT.
South African vehicle specifications may differ.

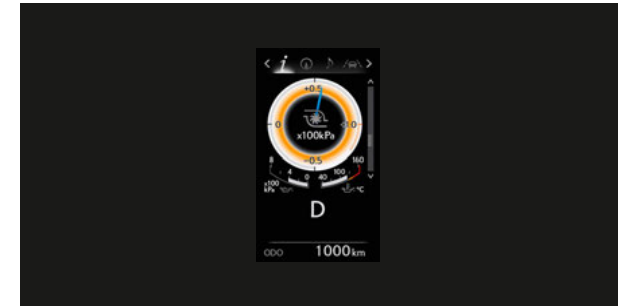

GREAT LOOKS, GREAT PERFORMANCE

Turbocharged performance plus exclusive F SPORT features including a tuned suspension, bold front fascia with exclusive mesh grille, black exterior mirrors, G-force, and turbo boost meter that measures the turbocharger pressure.

SEATS DESERVING OF A STANDING OVATION

The NX's exclusive F SPORT leather seats bolster full support during high-performance driving, with four-way adjustable headrests and integrated foaming construction, all complemented by aluminium finishes. The smooth leather seats feature perforated patterns that offer increased support and enhanced style.

BOOST METER

The boost meter measures turbocharger pressure levels. A white band has been adopted for the graphic scale to match the meter face. The band colour changes in the high-pressure range. An oil temperature gauge and an oil pressure gauge are displayed at the bottom of the boost meter.

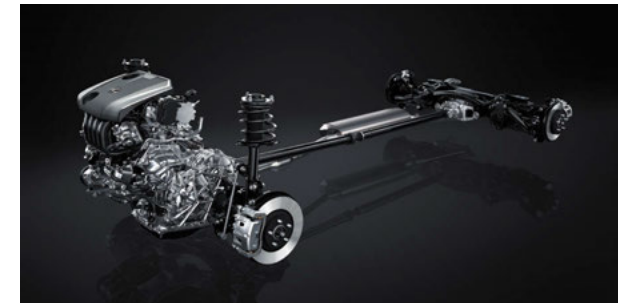

F SPORT BADGE

Although discreet, the F SPORT logo is a badge of distinction. The "F" refers to the birthplace and primary testing site of our high-performance F SPORT vehicles: Fuji Speedway, located near Mount Fuji.

F SPORT STEERING WHEEL

Featuring the F SPORT logo, you'll sense a special kind of connectedness every time you take this wheel in your hands. Finished in 3-spoke leather, the F SPORT gearshift design matches the steering wheel to create an exciting sports ambience.

LUXURY WITH PURPOSE

Experience excellent handling stability thanks to the front and rear performance dampers that enhance the vehicle's rigidity and minimises vibration.

The image shows the interior of a car with several white airbags deployed. There are two large front airbags for the driver and front passenger, two side airbags for the front seats, and a rear airbag for the back seat. The car has black leather seats and a black dashboard. The text "SOUNDLY SAFE" is overlaid on the right side of the image.

SOUNDLY SAFE

The NX comes with eight airbags, and standard fog and cornering lights that help keep your eyes on the parts of the road that you may not normally see.

LEXUS SAFETY SYSTEM+

LEXUS SAFETY SYSTEM+*

The NX comes with the Lexus Safety System+ that has been developed with the aim of further reducing road accidents. This includes:

- Pre-Crash System
- Adaptive Cruise Control
- Lane Departure Alert
- Automatic High-Beam

BLIND SPOT MONITOR*

Blind Spot Monitor with Rear Cross Traffic Alert detects vehicles in adjacent lanes that are not visible on the door mirrors. If the driver is indicating to change lanes and a vehicle enters the blind spot, a warning signal appears on the relevant door mirror.

ADAPTIVE ALL SPEED* CRUISE CONTROL

The system uses the millimetre wave radar sensor and camera to detect the vehicle in front and provide control to maintain an appropriate distance. If the vehicle in front comes to a halt, the system will stop the NX. When the vehicle moves off again, the NX will start off and continue following.

PANORAMIC VIEW MONITOR*

The Panoramic View Monitor helps you reverse into parking spaces. On the central display it shows a video image of the space into which you are reversing and overlays guidelines to facilitate you steering the car. It provides a near-360° view around the entire car and also creates a virtual 3D picture of your NX, with on-screen guides to assist close-quarter manoeuvring in the city.

LANE TRACE ASSIST*

Lane Trace Assist with Lane Keep Assist helps the driver to keep the NX in the centre of the lane. If the system determines that there is a possibility of the NX departing from the lane, it will switch to departure prevention control, providing support for returning the car to the centre of the lane.

TRACTION CONTROL (TRC)

Traction Control increases the NX's grip, especially when starting off or accelerating on an uneven or slippery surface. Corrective measures are applied the moment the risk of wheel-spin is detected, thereby maintaining traction.

*Available on F SPORT and Hybrid models only.
Images shown for illustrative purposes.

FULL PERFORMANCE **ZERO IMPACT**

HYBRID

The Lexus NX 300h SE is fuel efficient and produces zero emissions when in Electric Vehicle mode. The advanced petrol-electric hybrid system uses the revolutionary Self-Charging Hybrid system, an industry innovation which means you conveniently never have to charge the NX. The combined power from the 2.5-litre petrol engine and the nickel hydrogen battery system is 114kW at 5700rpm, and combined torque is 210Nm at 4200-4400rpm. An Electronically Controlled Variable Transmission (CVT) maximises both efficiency and performance.

LEXUS MAINTENANCE

INTRODUCTION

At Lexus, we take pride in the advanced engineering and craftsmanship of the vehicles we build. For that reason, our Warranty and Distance Plans are designed to provide Lexus owners with seamless vehicle maintenance and complete peace of mind. The Lexus Warranty and Distance Plans both enjoy full support by Lexus SA and offer customers access to specialised servicing, maintenance and repair at any Lexus dealer in South Africa, Namibia and Botswana.

WARRANTY AND DISTANCE PLANS

To complement its comprehensive Warranty, the NX 300 features a Distance Plan Complete that provides for service and maintenance costs. The option to extend the period of cover is available for both the Warranty and Distance Plan Complete. These options can be discussed with your Lexus dealer. To familiarise yourself with the cover provided by Warranty and Distance Plan on the NX 300, please consider the information below.

WARRANTY

- Duration: 7 Years or 105 000km from original date of sale.
- Cover: Repair or replacement of components that fail or malfunction as a result of manufacturing or material defect.

DISTANCE PLAN

The NX 300 features a Distance Plan Complete that will incept with the vehicle's Warranty.

- Duration: 7 service intervals or up to 105 000km.

- Cover: All servicing as per manufacturer's schedule (at least every 12 months or 15 000km) as well as the replacement of components as a result of normal wear and tear.

Consult with your Lexus dealer for more information on the terms and conditions of the Warranty and Distance Plan Complete offered on the NX 300. The NX 300h SE has a Hybrid Battery Warranty of 8 years/195 000km.

LEXUS LIFE

Our online magazine, Lexus Life celebrates innovative design, sustainable technologies and premium experiences around the globe.
